

# Sustainability for the Future

# Our presence in Jewry Street supports our community.....

*.....but the building is old, expensive, currently not 'green'*

# Green energy works

---

# Enabling works

---

# A vision of 'Sustainability for the Future' is emerging.

## Green Energy Works

## Enabling Works

## Sustainable Habits

*Providing a long-term future for our community in Jewry Street*

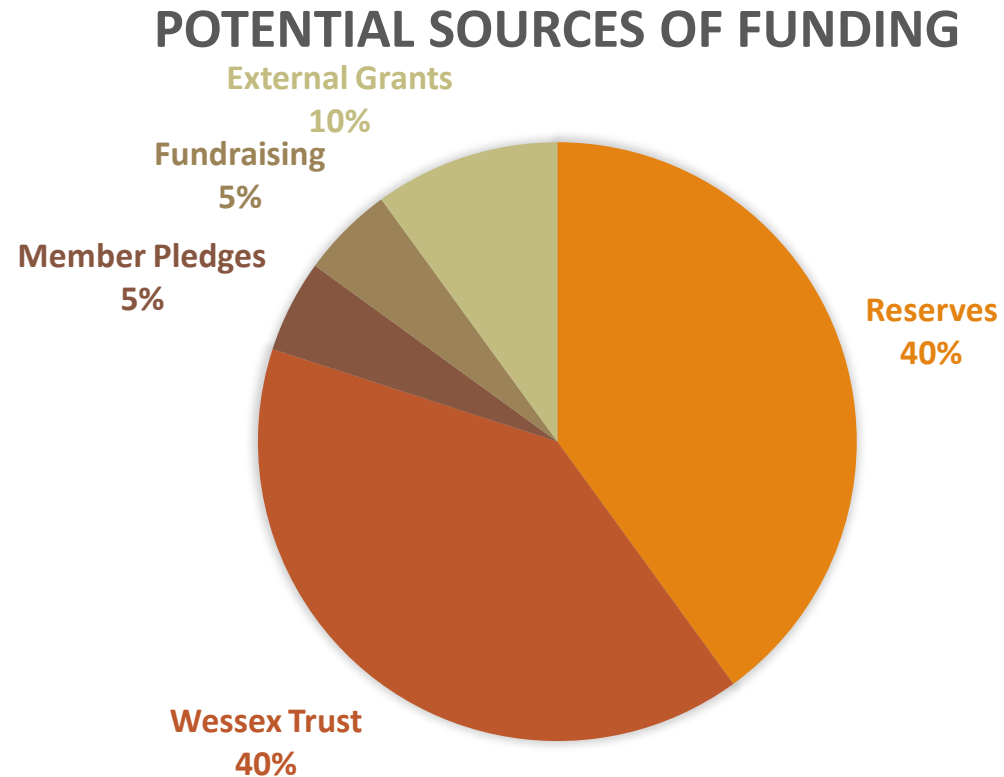

# But work on our buildings would be expensive.

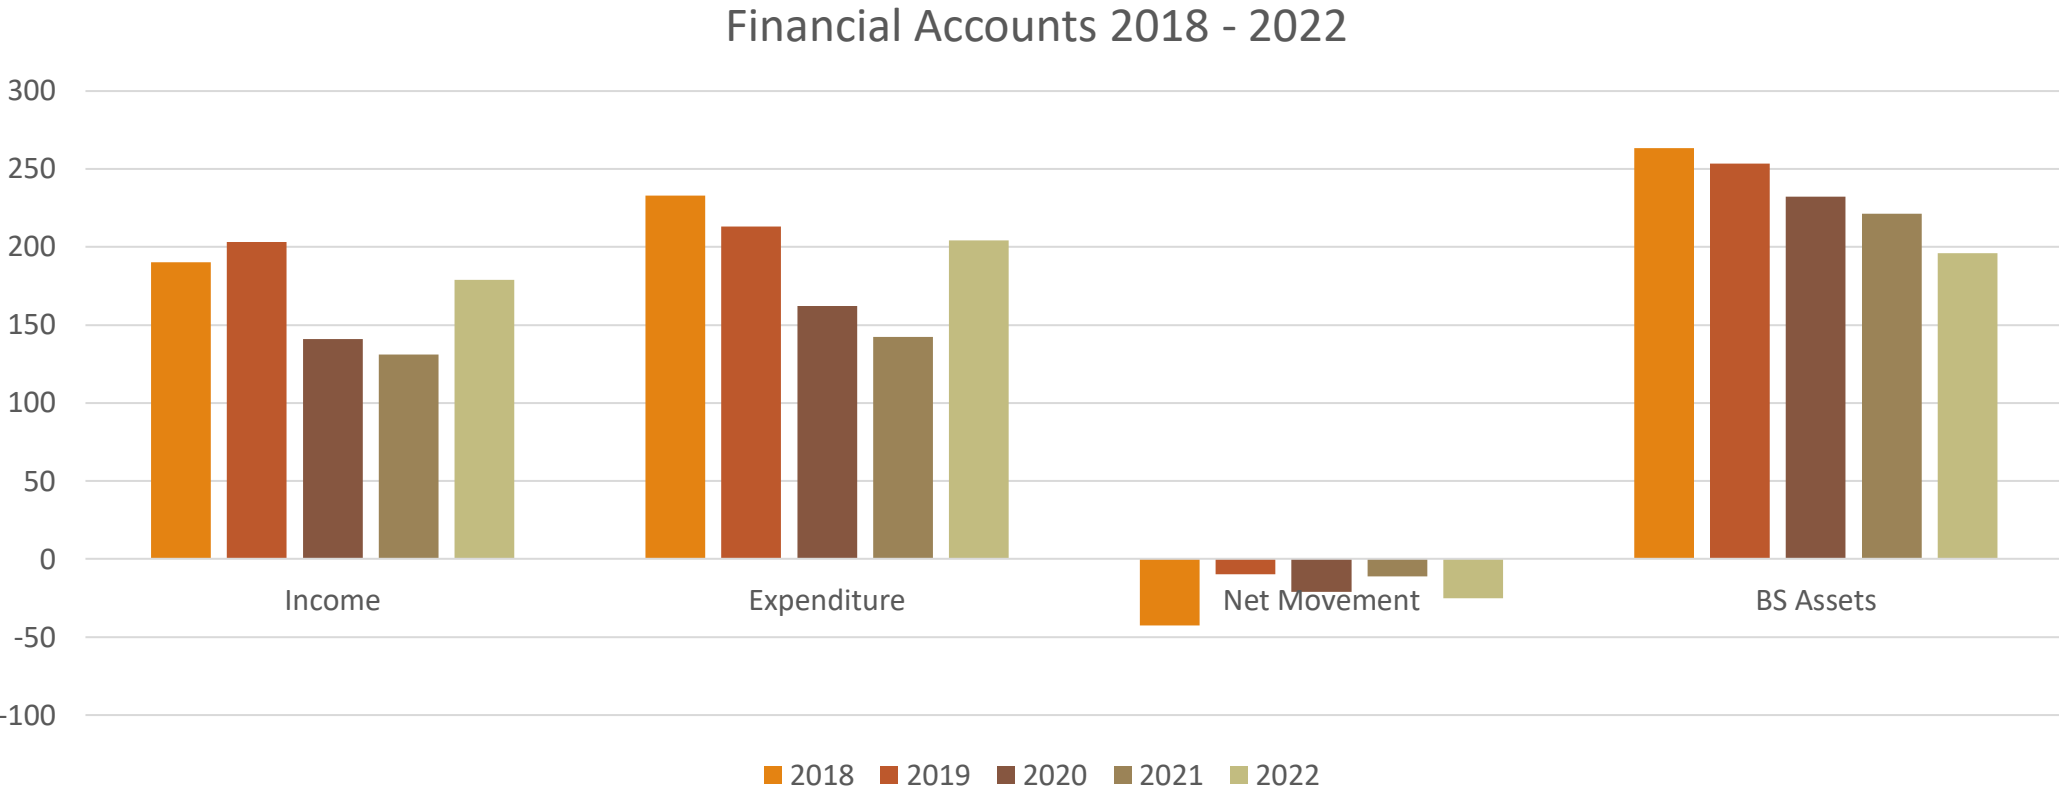

*Including contingency & inflation (10% each) it could amount to more than £285k*

.....and would require funding from Reserves and Members.

---

# Project costs, and regular income and expenditure must balance

# We have reinvented ourselves before!

---

In 1974 our three churches merged

It took 17 years to complete the refurbishment

The whole church committed to the project

The project was an act of faith

Delivered by a hard-working group of people

It changed our church forever

*(From Hampshire Chronicle 2<sup>nd</sup> September 2014; 40 years celebration; Photo from 2011)*

# This is another opportunity for change & renewal

---

It is about more than our building

It is about community

It is about Evangelism and Mission

It is about caring for God's Creation

It took vision, courage, and above all faith to change last time

With God's help can we do it again?

**UNITED CHURCH  
WINCHESTER**

# Gather in groups of five to answer these questions

---

1. How important is staying in Jewry Street to our Community & Mission?
2. How important is sustainability in caring for God's Creation?
3. How willing are you to help fund the 'enabling' and/ or 'energy' works?
4. How willing are you to accommodate the disruption the building works require?

1: not important / not willing

5: very important / very willing

*Your answers will guide our next steps*

# Appendix: cost estimate breakdown

Green Energy Works	Costs	Enabling Works	Costs
Solar	35,000	Fire Doors	42,000
Lighting	35,000	Roof	60,000
